Curriculum Committee
January 31, 2011 CETES 207 3:30
Approved minutes

Agenda Items

1. Consideration of minutes from January 31, 2011: Justin Walton moved to approve the minutes. Carla Guthridge seconded. The motion carried.

2. Curriculum changes
   a. Computing and Technology
      The creation of a minor in Information Technology was proposed, with the following description: “18 semester hours of the Information Technology Program including IT 2063 and IAS 2233. Note that CIS 1013 may not count toward this minor.” Carla Guthridge moved to recommend that this be included as a defined minor. Bob Bausch seconded. The motion carried.
      A new course, IAS 2113, Computer Forensics, was proposed. The cost estimate included $5000 for a forensics discovery computer. Buckley pointed out that this computer had already been purchased and should not be included in the cost estimate. Greg Herring moved to approve the course with the change in the cost estimate. Misael Santiago seconded. The motion carried.
      Program modification: IAS 2113, Computer Forensics, will replace IAS 2013, History of Information Assurance/Security, in option 3 of the Major in Information Technology. Carla Guthridge moved to approve the modification. Misael Santiago seconded. The motion carried.
   b. Sociology
      It was proposed that SOCI 4903 be created and added as a Capstone course in Sociology. Buckley noted a change to the Cost Per Student Credit Hour. Bob Bausch moved to recommend approval of the course creation. Marie-Ginette Baillargeon seconded. The motion carried.
      Bob Bausch moved that SOCI 4903 be added to the requirements for the major in Sociology, raising the required hours from 36 to 39. Greg Herring seconded. The motion carried.
   c. Chemistry
      Modifications to the program have been discussed at the last two Curriculum Committee meetings. A revised checksheet for the proposed degree options was presented with wording added at the end of option 2 to clarify electives. The words “lower division” were cut from Section B of the Health Profession option, as all the courses listed there are lower division. Carla Guthridge moved to recommend approval of the changes to the program. Bob Bausch seconded. The motion carried.

3. Informational: The General Education Committee has recommended the removal of CHEM 1474 and CHEM 1471 from the list of courses that satisfy the General Education requirements. To enroll in Chemistry II, students must first pass Chemistry I, which already satisfies the requirement.

4. Next meeting: February 28, 2011
